

CHARLES GOODSIR

Auckland, NZ • goodsirces@gmail.com • 027 814 4772 • [LinkedIn](#) • [Portfolio](#) • [Detour App](#)

PROFESSIONAL SUMMARY

Technically versatile application engineer and career-transitioning security professional with 4+ years delivering enterprise software solutions and a self-shipped, live mobile app on the App Store. Pursuing CompTIA Security+ (SY0-701) with hands-on experience in automation, cloud architecture, and adversarial thinking developed through scripting and penetration-adjacent problem solving.

EXPERIENCE

Software Application Engineer - Finance Domain | Datacom Solutions

Auckland, NZ | Sep 2021 - Present

- Architected and delivered CRM/ERP solutions across NZ & AU local council clients, reducing configuration defect rates by ~30% through standardised testing frameworks.
- Engineered end-to-end workflow automation using Gherkin-based test scripting, cutting a critical workflow runtime by 90% (2.5 min → 20 sec) and eliminating a class of recurring production defects.
- Drove adoption of a new enterprise finance module across 3 councils by leading training sessions and sprint demos, achieving 100% go-live on schedule.
- Mentored junior engineers, accelerating their time-to-independent delivery.

Service Desk Analyst | Datacom Solutions (MBIE)

Wellington, NZ | Sep 2020 - Sep 2021

- Resolved 200+ IT incidents per month across phone, email, and remote sessions for the Ministry of Business, Innovation and Employment, maintaining a first-call resolution rate above 80%.
- Reduced repeat support call volume by 25% by identifying recurring issue patterns and authoring knowledge-base articles adopted across the wider service desk team.
- Triageed and coordinated escalation of critical infrastructure incidents involving network access, identity management, and remote desktop services, minimising mean-time-to-resolve by ~35%.

PROJECTS

Detour – Cross-Platform Mobile App (Solo Developer) | Live on App Store

| 2024 - Present

- Architected a production-grade full-stack mobile app from zero using React Native, TypeScript, Supabase, and Firestore handling auth, geolocation, real-time data, and social features.
- Engineered Supabase Auth with row-level security policies to enforce data access controls, restricting user data exposure to authenticated owners only.
- Implemented geolocation-based content filtering with sub-200ms query performance by optimising PostGIS spatial indexes on a self-managed Postgres instance.
- Deployed to production via CI/CD pipeline (Expo EAS), reducing manual release effort to near-zero and enabling over-the-air updates without App Store re-submission.
- Built and shipped the app independently from architecture to App Store approval demonstrating end-to-end ownership of the software development lifecycle.

Python Automation & Scripting | Personal Projects

| Ongoing

- Built web scrapers and data-gathering bots in Python to automate collection of structured information from public sources, reinforcing practical knowledge of HTTP, APIs, and data parsing.

EDUCATION & CERTIFICATIONS

CompTIA Security+ (SY0-701)	In Progress - Expected 2025
Active exam preparation via Percipio; weekly practice exams; focus areas: threat analysis, identity & access management, cryptography, security operations.	
Level 6 Diploma in Applied Software Development	Dev Academy Aotearoa 2023 - 2024
BA - History, International Relations & Political Science	Victoria University of Wellington 2017 - 2020

SKILLS

Languages	TypeScript, JavaScript, Python, SQL, YAML, HTML/CSS, C# (.NET - enterprise context)
Cloud & Infra	Supabase (Postgres + PostGIS), Firestore, Azure DevOps, CI/CD (Expo EAS), Git
Frameworks	React Native, React, Node.js
Tools	Confluence, Jira, Miro, Azure DevOps, Gherkin / BDD
Practices	Agile/Scrum, threat-oriented UAT, technical documentation, incident triage, mentorship
Certifications	CompTIA Security+ SY0-701 (in progress)
