PROFESSIONAL SUMMARY

Cybersecurity analyst and application engineer with 4+ years of enterprise development experience and CompTIA Security+ (SY0-701) certified. Background spans .NET/C#, TypeScript, React Native, and Azure, with hands-on experience across cloud architecture, CI/CD pipelines, access controls, and secure application design. Independently shipped a cross-platform mobile app live on the App Store. Transitioning into cybersecurity with a strong foundation in secure software engineering, identity and access management, and cloud security principles, targeting Security Analyst and Cloud Security Engineer roles in the NZ and Australian market.

EXPERIENCE

Software Application Engineer – Finance Domain

Sep 2021 – Present

Datacom Solutions | Auckland, NZ

- Architected and delivered CRM/ERP solutions for NZ & AU local council clients, reducing configuration defect rates by ~30% through standardised testing frameworks.
- Engineered end-to-end workflow automation using Gherkin-based test scripting, cutting a critical workflow runtime by 90% (2.5 min → 20 sec) and eliminating a class of recurring production defects.
- Led training sessions and sprint demos to drive adoption of a new enterprise finance module across 3 councils, achieving 100% on-schedule go-live for each.
- Mentored junior engineers on testing practices and configuration standards, accelerating time-to-independent delivery.
- Developed and maintained automation scripts in C# and YAML within an Azure DevOps pipeline, improving release reliability and reducing manual intervention.

Service Desk Analyst

Sep 2020 – Sep 2021

Datacom Solutions (MBIE) | Wellington, NZ

- Resolved 200+ IT incidents per month across phone, email, and remote sessions for the Ministry of Business, Innovation and Employment, maintaining first-call resolution above 80%.
- Reduced repeat support volume by 25% by identifying recurring issue patterns and authoring knowledge-base articles adopted across the wider team.
- Triaged and coordinated escalation of critical infrastructure incidents involving network access, identity management, and remote desktop services, reducing mean-time-to-resolve by ~35%.

PROJECTS

Detour – Cross-Platform Mobile App (Solo Developer)

2024 – Present

Live on App Store

- Architected a production-grade full-stack mobile app using React Native, TypeScript, Supabase, and Firestore handling auth, geolocation, real-time data, and social features.
- Implemented Supabase Auth with row-level security policies to enforce data access controls, restricting user data exposure to authenticated owners only.
- Achieved sub-200ms geolocation query performance by optimising PostGIS spatial indexes on a self-managed Postgres instance.
- Deployed to production via CI/CD pipeline (Expo EAS), enabling over-the-air updates and reducing manual release effort to near-zero.
- Sole owner of the full software development lifecycle from architecture and security design through to App Store submission and approval.

Python Automation & Security Scripting

Ongoing

Personal Projects

- Built web scrapers and API-driven data pipelines in Python to automate collection of structured information from public sources, reinforcing practical knowledge of HTTP, REST APIs, and data parsing.
- Applied scripting to simulate and analyse data-gathering attack surfaces, developing working knowledge of rate-limiting behaviour, robots.txt boundaries, and response fingerprinting.

EDUCATION & CERTIFICATIONS

Security+ (SY0-701) <i>CompTIA Completed 2026</i>	2026
Level 6 Diploma in Applied Software Development <i>Dev Academy Aotearoa</i>	2023 – 2024
BA – History, International Relations & Political Science <i>Victoria University of Wellington</i>	2017 – 2020

SKILLS

Languages	C#/.NET, TypeScript, JavaScript, Python, SQL, YAML, HTML/CSS
Cloud & Infra	Azure, Azure DevOps, Supabase (Postgres + PostGIS), Firestore, CI/CD (Expo EAS), Git
Frameworks	React Native, React, Node.js, .NET
Tools	Confluence, Jira, Miro, Gherkin/BDD
Practices	Agile/Scrum, secure application design, threat-oriented UAT, incident triage, technical documentation, mentorship
