## Professional Summary

Configuration Engineer with 4+ years' experience delivering enterprise CRM/ERP solutions and full-stack mobile apps. Skilled in React Native, TypeScript, and cloud platforms (Supabase, Firestore). Adept at automating workflows, optimizing performance, and collaborating with cross-functional teams to deliver scalable, user-focused software. Currently working on strengthening my Python skills by creating bots and webscrapers for information.

## Technical Skills

**Languages & Frameworks:** React, React Native, TypeScript, JavaScript, HTML, CSS, Python, YAML

**Cloud & Databases:** Supabase, Firestore, CI/CD (Expo EAS), Git, Confluence, Azure DevOps

**Practices:** Agile/Scrum, Automation Testing (Gherkin), Mentorship, Training Delivery, Miro, Technical Problem Solving, Technical Business Process Analysis, Technical Documentation, Presentation Skills, Time Management, Team Player

## Experience

### Datacom Solutions (NZ) – Software Configuration Engineer - Finance Domain

Auckland, NZ | Sep 2021 – Present

- Designed and delivered CRM/ERP solutions across NZ & AU, improving consistency and compliance for local councils.
- Automated workflows and testing, reducing defects and cutting workflow runtime by 90% (2.5 min → 20 sec).
- Collaborated with BAs, developers, and product managers in enterprise Agile teams to release new features.
- Strengthened client adoption by leading weekly CRM/ERP training sessions and sprint reviews.
- Authored technical documentation in Confluence and mentored junior analysts.

### Datacom Solutions (NZ) – Service Desk Analyst

Wellington, NZ | Sep 2020 – Sep 2021

- Provided first-line IT support for MBIE, resolving user issues across phone, email, and remote sessions.
- Ensured accurate incident tracking and knowledge sharing, reducing repeat support calls.
- Escalated and coordinated complex technical issues, maintaining strong customer satisfaction.

## Projects

### Mobile App – React Native, Supabase, Firestore, TypeScript

- Built a cross-platform app for discovering points of interest with social and navigation features.
- Architected backend with Supabase (posts, geolocation, friendships) and Firestore (real-time updates).
- Integrated Supabase Auth for secure login, and optimized image handling with caching.
- Implemented geolocation-based filtering, enabling dynamic discovery of nearby attractions and user posts.
- Deployed to App Store via CI/CD with Expo Application Services (EAS).
- App Store Link: <https://apps.apple.com/nz/app/detour/id6743507600>

## Education

Dev Academy Aotearoa – Level 6 in Applied Software Development | Jul 2023 – Jan 2024

Victoria University of Wellington – BA, History, International Relations, Political Science | Feb 2017 – Jan 2020
